Apiculture and Agriculture .15. Beekeeping and Livelihoods. 16. Marketing Techniques. References. Appendices. Honey is a gift of nature to the mankind. The worker honey bees collect nectars from the flowers, processed in their special stomach, called 'honey stomach' and deposit it in honeycomb by regurgitated processed nectar. In ancient times, the honey collectors used to collect honey from wild beehives attached to the rocks, trees or house corners. This practice is still continued today in most of the developing countries including India. The keeping of bees in hives and obtaining honey was started by a bishop in Hartz Mountain of Poland during 11th century. This probably was the first commercial production of honey. However, when Lorenzo Lorraine Langstroth, a resident of Yorkshire migrated to USA, discovered 'the movable comb honey'. During 19th century, the beekeeping was started scientifically in all other countries and developed the technology of obtaining honey and other bee products like royal jelly, propolis, beebread, apitoxin, beeswax (zebrus) and apichitin in pharmaceutical, food industries, cosmetics, paints, polish, etc. The beekeeping is an important bioresource of sustainable development of livelihoods and its role in removing poverty. It increases the agricultural crop yield by 10 per cent to 20 per cent through pollination by bees. Hence, bees are the friends of the farmers. It can be a...
